INSTRUCTIONS FOR SAFE USE

Preparation: Strings can cause strangulation.
DO NOT place items with strings around a child’s neck, such as hood strings or puller cords.
DO NOT suspend strings over product or attach strings to toys.
Always keep child in view while in product.
The product may contain small parts. Adult assembly is required.

- Prevent access to stairs, steps, and uneven surfaces.
- Guard all fires, heating and cooking appliances.
- Remove hot liquids, electrical flex, and other potential hazards from reach.
- Prevent collisions with glass doors, windows, and furniture.
- This product frame should be used only for short periods of time (e.g. 20 minutes).
- This product frame is intended to be used by children who can sit unaided, approximately from 6 months. It is not intended for children weighing more than 12 kg.
- Before use: Check that the product frame is correctly assembled.
- Check regularly that all fasteners and components are secure. Tighten and adjust as necessary and the casters rotate and run freely. That no components are broken or missing.
- Do not use the stationary activity center if it is damaged or broken.

Non-approved spare parts may render the repair or baby activity center unsafe.

Battery Information:
Do not mix new and used batteries. Do not mix different types of batteries.
Only use replacement batteries of the type recommended. Recommended batteries: 2x1.5 4/AA/SUMS/LR6
Always remove exhausted batteries from the product. Do not attempt to charge non-rechargeable batteries. Remove rechargeable batteries before charging.
Charge under adult supervision.
The batteries must be expended with the correct polarity.
DO NOT short-circuit the battery.

Battery Disposal:
Dispose of exhausted batteries at an official waste disposal site.
Do not burn or place in household waste.

Product care:
Wipe all plastic/metal parts clean with a damp cloth using mild soap, dry thoroughly.
Light soiling of the seat pad can be removed with a damp cloth and a mild soap.
Machine wash seat pad in cold water on a gentle cycle. Do not use strong detergents or abrasive materials. Do not dry clean. Do not tumble dry. Line dry the seat pad.
To maintain stopping performance, clean friction strips regularly with damp cloth.

To assemble

1 Base section
Place the base section on the floor. Insert the hook ‘a’ into loop ‘b’, press downward until it is secure. Ensure 3 of base section are linked as drawing shows (2).

2 Open frame supporter
Turn one side of frame supporter outward (1) until you hear the frame supporter lock into position (2).

3 To assemble and install the frame supporters into top section
Place the top section of the jumperoo upside down on the floor. Slot the top of the frame supporters onto the holes indicated in the fig (1) diagram. Using moderate force, push the frame supporter in the top section. Ensure that the supporters are fully inserted before proceeding.

4 To assemble top and base section
Place the base section of the jumperoo on the floor. Slot the end of frame supporters ‘a’ into the holes indicated in the drawing (1). Push the frame supporters into the base section. Ensure that the frame supporters are fully inserted before proceeding.

5 To adjust the height of the Activity Centre
Locate red pin ‘b’ at the back of frame supporters and pull as to release the safety lock (1). Then press button ‘a’ at the front of the frame supporter to adjust to the desired height (2). Ensure to lock the height position by pulling down the red pin ‘b’ (3).

6 Attaching the car
Insert the toys into the housing with in the jumperoo top section, paying particular attention to the direction, as shown in fig 1 & fig 2.
Once the toys has been inserted into the upper tray twist to fix in to the locked position.
The toy tray requires 2 x AA batteries. Unscrew the battery door and insert batteries. Ensure battery polarities are correctly aligned with the polarties within the battery compartment. Place the car toy and press firmly until you hear the 'car' sound.

7 Attaching the toy tray
Place the toy tray into the holes located on the top section and turn the tabs around to secure the toy tray to the walker.

8 To assemble the crab and turtle toy tray
Insert the crab bar into the hole in the crab base and push until they lock together as shown (1). Position the crab and turtle toy trays as shown (2) and (3) shown and push firmly to lock into position. Ensure both trays are correctly fitted.

9 Attaching the toys
The toy tray requires 2 x AA batteries. Unscrew the battery door and insert batteries. Ensure battery polarities are correctly aligned with the polarities within the battery compartment. Place the car toy and press firmly until you hear the 'car' sound.

10 To assemble the mat
Place the jumperoo on the floor, slot the hook of the mat into the holes indicated in the top diagram. Using moderate force, push the hook into the holes in the base section.

11 Fitting the seat pad
Position the seat pad into the top section. Using moderate force push downwards until it locks in the top section.

12 To attach the wheels
Insert the wheels into the moulded socket in the direction indicated by the arrow. Then push firmly until clicks into place.

13 To stope the jumperoo
Pull forward of safety pin at left side of each frame supporters fig (2), and press button ‘b’ at right side of each frame supporters, then forward the frame supporters to the center of jumperoo. Make sure all three frame supporters are forward to the center of jumperoo.

14 Opening the jumperoo
Lift the top section upwards, until three frame supporters are starded as shown in fig (3).
